

DATREX 320RT Type I USCG DX320RTJ / DX321RTJ

TYPE

Type I USCG Approved Offshore PFD / Lifejacket

USES

Datrex 320RT and 321RT (Child size) general purpose USCG approved Type I offshore PFD is an inherent buoyant lifejacket with maximum buoyancy for adults and children in rough offshore conditions. It is designed to turn an unconscious person from face down in the water to a vertical or slightly backward position. It provides many years of trouble free service made with weather and fade resistant fabric and nonabsorbent polyethylene foam that will not lose buoyancy if cut or punctured. Sewn on SOLAS retro-reflective tape meet or exceed all requirements for commercial vessels carrying passengers for hire. This flotation device is recommended for use in offshore use.

FEATURES

Large patches of SOLAS grade reflective. Light loop and whistle attachment over shoulder. Strongest stainless steel hardware available. Available child size.

SPECIFICATIONS

ITEM NO.	DX320RTJ / DX321RTJ	
USE	Offshore USCG Type I PFD	
SIZES	Adult Universal and Child (DX321RTJ)	
MINIMUM BUOYANCY	22 lbs	
FOAM	Polyethylene	
SHELL MATERIAL	Weather and fade-resistant polyester	
RETRO-REFLECTIVE	SOLAS grade	
COLOR	International Orange	

APPROVAL/COMPLIANCE

United States Coast Guard
